```
# This Python 3 environment comes with many helpful analytics li
# It is defined by the kaggle/python Docker image: https://githu
# For example, here's several helpful packages to load
```

```
import numpy as np # linear algebra
import pandas as pd # data processing, CSV file I/O (e.g. pd.read_csv)
```

```
# Input data files are available in the read-only "../input/" di
# For example, running this (by clicking run or pressing Shift+Enter) will list the files in the input directory
```

```
import os
for dirname, _, filenames in os.walk('/kaggle/input'):
    for filename in filenames:
        print(os.path.join(dirname, filename))
```

```
# You can write up to 20GB to the current directory (/kaggle/working)
# You can also write temporary files to /kaggle/temp/, but they won't be saved outside of the current session
```
